EMBER™

EMBER is a security-first consulting and managed services firm. We specialize in cybersecurity, IT operations, engineering, and analytics—built for scale, resilience, and results. Whether transforming legacy systems or managing critical environments, we help organizations thrive in complexity.

Security is at the core of everything we touch, implement, and manage. We don't just detect threats—we neutralize them swiftly and implement forward-looking defenses to keep clients ahead of what's next. With deep expertise spanning cybersecurity, strategic consulting, and full-lifecycle IT operations, EMBER builds custom teams aligned to each organization's unique needs. Whether securing critical infrastructure, modernizing legacy systems, or managing complex environments at scale, we deliver the precision, flexibility, and resilience today's digital landscape demands.

RELENTLESS SECURITY
SECURITY SERVICES

Security is our focus 24/7/365. Our proactive, always-on approach, combined with best-in-class strategic partnerships safeguards your critical infrastructure and network systems, empowering our clients to meet the critical challenges of maintaining security in an ever-evolving threat landscape.

– Persistent Vulnerability Management

– Endpoint Protection

– Penetration Testing

– Awareness Training

– Continuous Threat Exposure Management

WHO WE ARE Led by two seasoned technology leaders who bring a blend of enterprise expertise and entrepreneurial execution. EMBER delivers a comprehensive range of services—from strategic problem solving and hands-on implementation to long-term operational support. Our team unburdens clients from the constant pressure of managing complex technology, so they can focus on growth, performance, and resilience.

EMBER

MANUFACTURING SERVICES

EMBER provides solutions that keep production lines running, protect operational data, and integrate systems across plant floors and offices for improved agility and security.

TAILORED SOLUTIONS

1. **Factory & Office IT Infrastructure Support:** End-to-end management of networks, servers, and workstations to ensure plant and back-office uptime.

2. **Industrial Equipment Connectivity & IoT Support:** Secure integration and monitoring of smart manufacturing equipment and industrial IoT systems.

3. **Cybersecurity & Regulatory Compliance:** Safeguard against ransomware and meet standards like NIST, CMMC, and ISO 27001.

4. **Remote Monitoring & Help Desk for Multi-Site Operations:** Centralized IT support across plants, warehouses, and corporate offices.

5. **ERP & Manufacturing Software Support:** Coordination with vendors for platforms like SAP, NetSuite, and other production and inventory systems.

6. **Secure Backup & Business Continuity Planning:** Protect against system failure with regular backups and recovery strategies.

7. **Wi-Fi Optimization & Industrial Network Design:** Reliable wireless coverage across warehouses, loading docks, and shop floors.

8. **Virtual CIO & Strategic IT Planning:** Roadmap for infrastructure upgrades, plant expansion, and digital transformation.

9. **Device Lifecycle Management & Procurement:** Standardized, secure provisioning of desktops, rugged laptops, barcode scanners, and more.

10. **Cloud & Hybrid Infrastructure Support:** Tailored cloud solutions for managing remote sites, design files, and system integrations.
